

Allan Binu

Tempe, AZ | 480-401-6475 | allanbinu197@gmail.com | linkedin.com/in/allan-binu | github.com/abinu2 | US Citizen

PROFESSIONAL SUMMARY

CS graduate (Cybersecurity concentration, May 2026) and Incoming M.S. Robotics and Autonomous Systems Candidate. Full-stack TypeScript engineer with production experience on the exact HomeLedger stack: Next.js App Router, React, Prisma ORM, PostgreSQL, Clerk auth, Redis, Tailwind, and shadcn components. Shipped a production web application solo from schema design through CI/CD deployment. Comfortable across frontend, backend, database, and integrations in a monorepo environment. Remote-ready, US citizen.

EDUCATION

Arizona State University Tempe, AZ
B.S. Computer Science, Cybersecurity Concentration, Minor: Business Administration May 2026
Relevant Coursework: Data Structures and Algorithms, Distributed Systems, Operating Systems, Computer Networks, Machine Learning, Database Management

EXPERIENCE

Software Developer, Blockchain Security Aug 2025 – Present
Kimuntu Power Remote

- Build and maintain a production full-stack platform (KimuX): Node.js/Python backend APIs, React/TypeScript frontend; manage schema design and migrations across a live PostgreSQL database serving financial transactions
- Implement affiliate reward distribution, brokerage settlement, and payment integrations; debug production issues and ship fixes across frontend, backend, and database layers
- Coordinate cross-service data consistency between on-chain (Solidity contracts) and off-chain systems via async event-driven API bridge

Undergraduate Tutor, Data Structures and Algorithms Aug 2024 – Present
Arizona State University Tempe, AZ

- Mentor 30+ students per semester in algorithm design, recursion, graph modeling, and complexity analysis; build frameworks and worked examples that improve comprehension of core CS problem-solving patterns

Data Science Intern Jan 2024 – Jul 2024
Oracle (GTX) & GRAMMY Museum Tempe, AZ

- Built ETL pipelines with automated validation and integrity checks over 2M+ production records, reducing manual processing time by 35%; surfaced performance bottlenecks and data quality issues across production environments
- Delivered structured findings and engineering recommendations to cross-functional stakeholders; trained ML models (scikit-learn) for anomaly detection and pattern recognition

PROJECTS

RallyPoint 2026 – Present

Personal · Next.js 14 App Router, TypeScript, React Query, PostgreSQL, Prisma ORM, Redis, Clerk, Tailwind CSS, shadcn UI, Claude AI, GitHub Actions, Vercel

- A civic engagement platform that lets residents track local government actions, participate in community discussions, and measure collective impact; built solo on the exact HomeLedger stack: Next.js 14 App Router, TypeScript, Prisma ORM on PostgreSQL (12-model schema), Clerk auth/RBAC, Redis, and shadcn Tailwind components on Vercel with GitHub Actions CI/CD
- Implemented server actions, REST API routes with Zod validation, Redis rate limiting, and a Claude AI NLP moderation pipeline with 4-tier toxicity scoring; covers tenant-scoped data access, personalized feed, threaded discussions, and admin queue

Launchpad March 2026

Hackathon · Google Cloud Track Winner, Financial Literacy Track Winner · GCP, Vertex AI, Gemini, Firestore, Python

- An AI-powered small business operations platform with five integrated tools: Quote-to-Cash, Receipt Scanner, Contract Vault, Compliance Autopilot, and Growth Radar; each powered by Vertex AI and Gemini LLM pipelines with LLM-orchestrated document parsing; a shared Firestore Business Intelligence Graph maintains cross-tool state
- Won two competitive hackathon tracks; coordinated backend services across five tools in a single multi-integration API architecture and presented the full system under time pressure

Regulated Change Control Service 2026 – Present

Independent · Java, Spring Boot, PostgreSQL, Docker, GitHub Actions CI/CD, JUnit, Swagger/OpenAPI

- A regulated data workflow enforcement service that validates change records against configurable compliance rules, enforces electronic signature requirements, and gates non-compliant entries before they reach downstream systems; implements append-only PostgreSQL audit log tables, RBAC with permission-scoped endpoints, and automated report generation
- Production-grade backend: schema design with data access boundaries, migration management, JUnit test coverage, Docker containerization, GitHub Actions CI/CD, and Swagger/OpenAPI documentation

Infrastructure Engineering Home Lab 2026 – Present

Independent · Proxmox, Docker, Linux, Bash, pfSense, WireGuard, Splunk

- A private multi-node compute environment built to practice cloud-analogous infrastructure: runs isolated VMs on Proxmox with VLAN segmentation, pfSense routing, Docker-containerized services, WireGuard VPN, and Bash-automated provisioning; mirrors AWS compute, networking, and secrets management patterns used in HomeLedger's serverless backend

LEADERSHIP

VP of Leadership, Hacker Devils Cybersecurity Club Aug 2024 – Present

Arizona State University Tempe, AZ

- Organize 10+ technical events per semester (workshops, CTF competitions, security research); mentor 15+ members in vulnerability research and offensive security; team placed top 30% regionally

Principal, Sunday School Program 2025 – Present

St. Thomas Orthodox Church Phoenix, AZ

- Direct curriculum development across K-12 grade levels; oversee 12+ volunteer instructors and manage program operations for 50+ students

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL, Java, C/C++, Bash, Go, Solidity

Web and Full-Stack: Next.js App Router, React 18/19, Tailwind CSS, shadcn UI, React Query, REST APIs, server actions, Zod, Clerk, Stripe, Vercel

Backend and Cloud: Node.js, AWS Lambda, API Gateway, S3, SES, SQS, EventBridge, SSM, IAM, CloudWatch, Docker, GitHub Actions, Linux, Bash

Data Layer: PostgreSQL, Prisma ORM, Redis, schema design, migrations, data access boundaries, query performance, pgvector concepts

Integrations and AI: OpenAI API, Anthropic Claude API, Vercel AI SDK, Gemini, Vertex AI, PostHog, Sentry, HubSpot, Stripe Connect, RevenueCat concepts
